Product Description

What are the advantages of Stainless Steel Candle Holder With Plating?

First of all, stainless steel candle holder with plating can effectively prevent rust. Secondly, our candle holders are more heavy and the quality is better than the most of the candle holder in the market. Thirdly, we use argon welding instead of traditional welding, also we use polish the lantern by hands, the polishing are in good quality

Products Introduction of the Stainless Steel Candle Holder With Plating

The Stainless Steel mini Candle Holder With Plating are the best seller products of our factory. The stainless steel candle holder is made of stainless steel and tempered glass. For the stainless steel, we use SS430 which is around 0.7mm thickness to make the lantern. For some components we will use different thickness of the stainless steel because of the construction requirement. For the glass, we use the tempered glass, which is around 2.6mm thickness. And for the round glass tube, we use 2.5mm borosilicate glass tube.
